WHAT'S NEW

Discover it here.

We are proud to introduce you to our new 2023 collection. As always we keep our finger on the pulse for new trends and influences. Living in modern times, the need for personality and authenticity is translated into contemporary and responsible products to decorate your furniture.

Making the collection highly individual and locally crafted into our own factory. We aim to grow sustainable markets for our customers, for us, for hands, for everyone.

OUR STYLES

A STYLE FOR EVERYONE

Four main styles with their own vision.

Metakor divides their handles in 4 main categories or styles, to make it easier for the consumer to find the right handle for their specific furniture. These styles are called **Modern, Character, Traditional and Rustic**.

Character is a new style that replaces the Authentic style. We see that Authentic no longer fits the request from the market. With Character we can bring handles that reflect current trends and styles that fall outside of the Modern categorie. These handles give more detail to your furniture, higher decorative value and a sense of warmth.

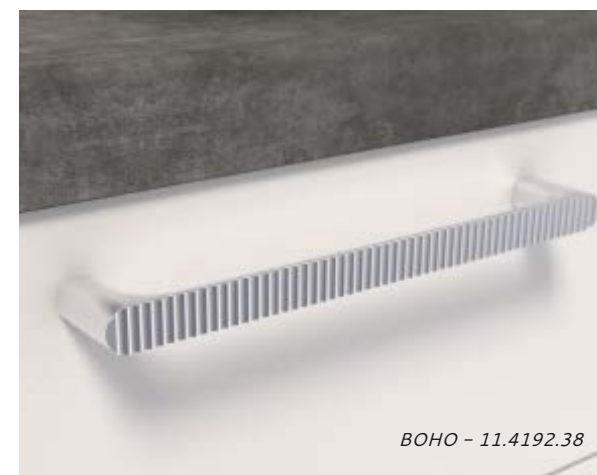

Modern and **Character** both offer solutions based in current trends and styles. The goal is to have products for every contemporary kitchen/interior. Continuous renewal and innovation is necessary in these segments.

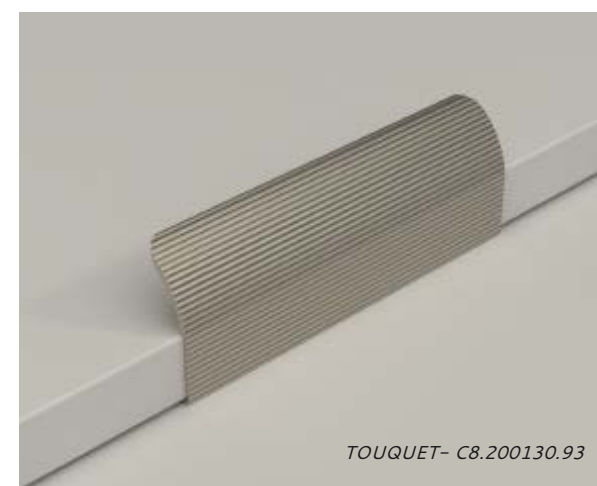

Traditional and **Rustic** are products that have a root in history and heritage. As they refer to older styles, they are less subject to constant renewal.

IN THE SPOTLIGHT

THE BAMBOO HANDLE

Designed by Peter Otto Vosding.

Peter Otto Vosding has created a handle that mimics the joints of bamboo. His inspiration lies in the natural beauty and functionality of real bamboo. These joints, the connection between the handle bar and feet, are beautiful and intricate, creating a unique and eye-catching design. One of the key benefits of the bamboo handle is its durability. Bamboo is known for its strength, and this quality is also incorporated into the design of the handle.
